

# Strategic Approach University of Bergen

Inger Nilsen, department of informatics

# Questions 1-3 How do they fit?

1. The role of students exchange within building strategic partnerships
2. How to develop exchange programs strategically?  
Between offering diversity and supporting strategic partnerships.
3. Conditions for expanding successful exchange programs into wider cooperation between institutions.

# An international research university

- The University of Bergen is an international research university dedicated to advancing research, science and higher education. On the basis of its academic history and traditions, the University of Bergen sets its sights on the future. It focuses on basic research, PhD-training, research-based teaching and the development of academic disciplines.
- The University of Bergen is involved in extensive international collaboration. It has signed bilateral agreements with universities, research institutions and academic centres of excellence in all parts of the world. Mobility and exchange are important to maintain and develop an international profile. The University of Bergen thus encourages both students and staff to go abroad and it urges faculties and departments to open their doors for international visitors.
